

The Road to Antibiotic Resistance

Note to Adult:

Did you know that over one-half of the antibiotics prescribed by doctors each year are unnecessary? Antibiotics are only effective against *bacterial* infections. But many are being misused to fight colds, coughs and other *viral* infections. And this can lead to Antibiotic Resistance, the inability for an antibiotic to be effective.

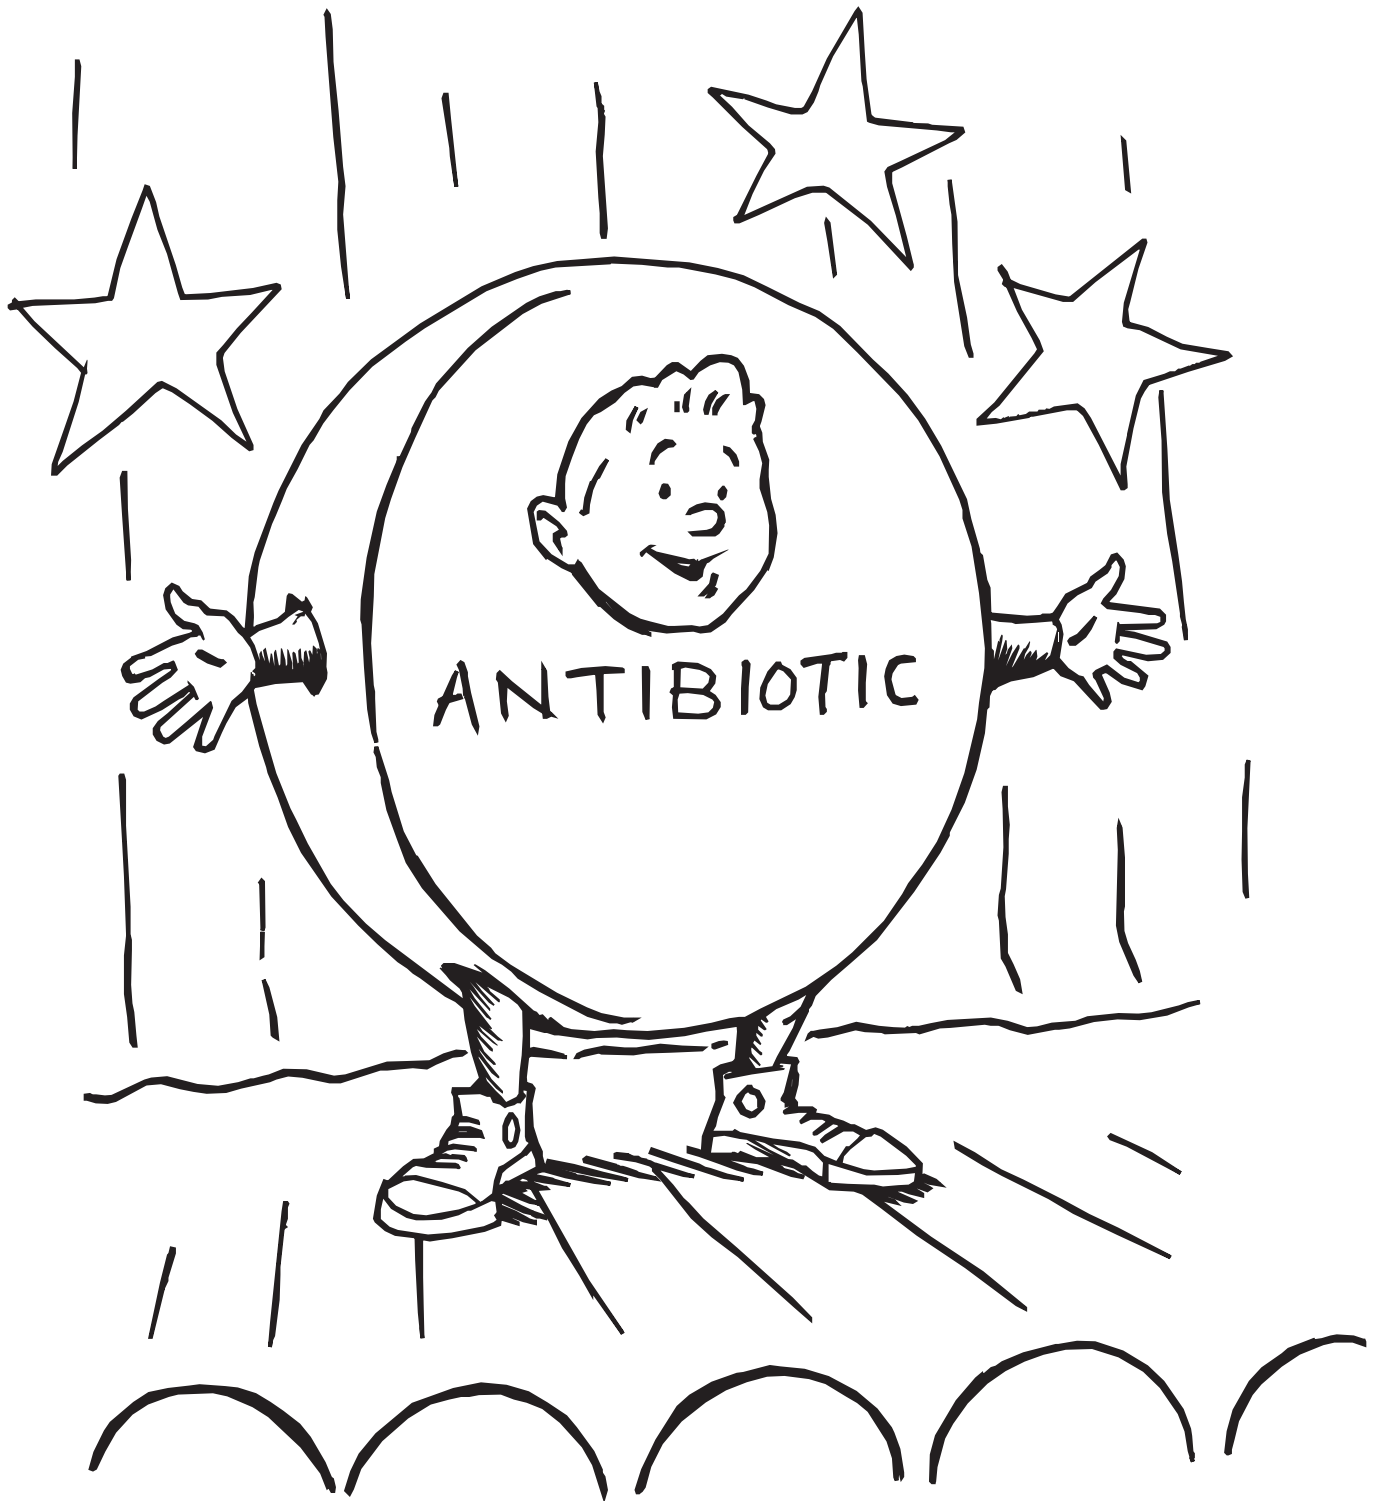

In an effort to raise awareness about this issue, the Arkansas Foundation for Medical Care (AFMC), in partnership with the Arkansas Department of Human Services (DHS), has created “The Road to Antibiotic Resistance” Project. This fun coloring and activity book is just one element of our entire campaign. We hope you use it as a learning tool to teach children about safe antibiotic use. We also encourage everyone to have a discussion with their physician.

For more information on other “The Road to Antibiotic Resistance” educational materials or to order additional coloring books please call 1-877-375-5700.

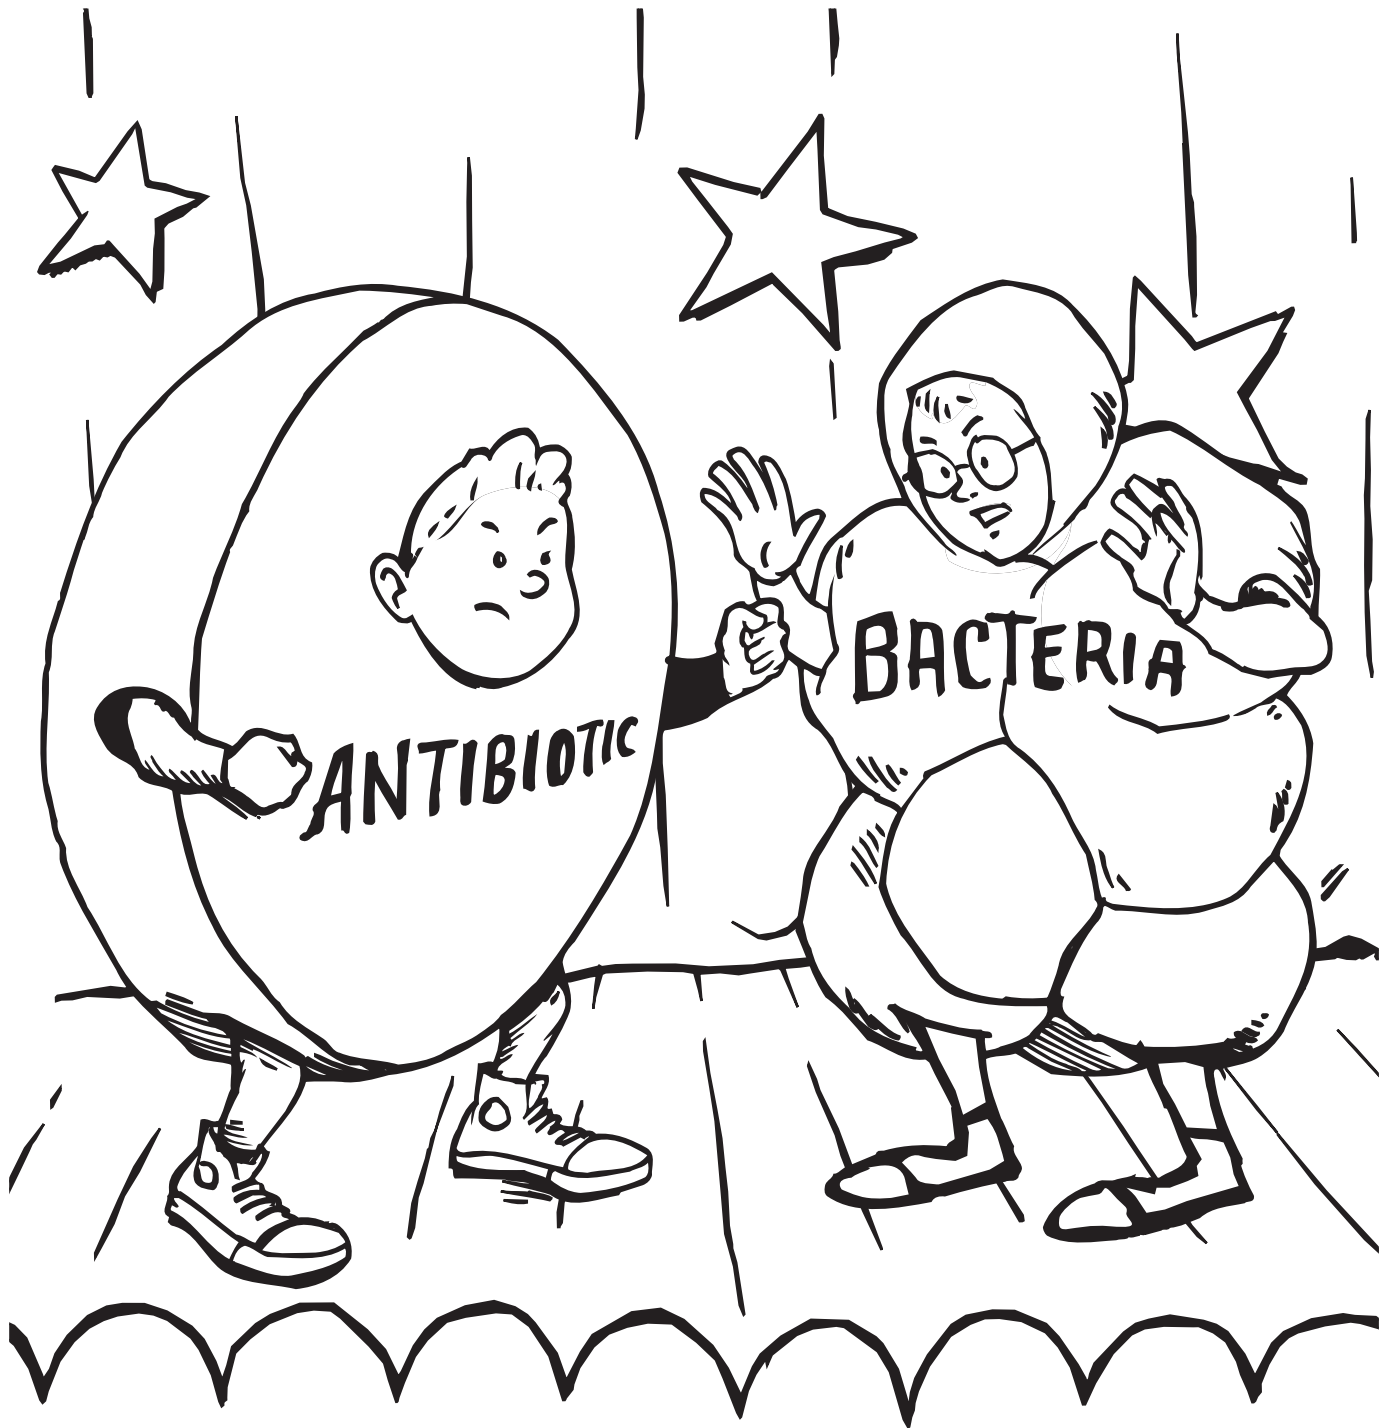

Act 1

"I am an antibiotic. A friend to healthy families."

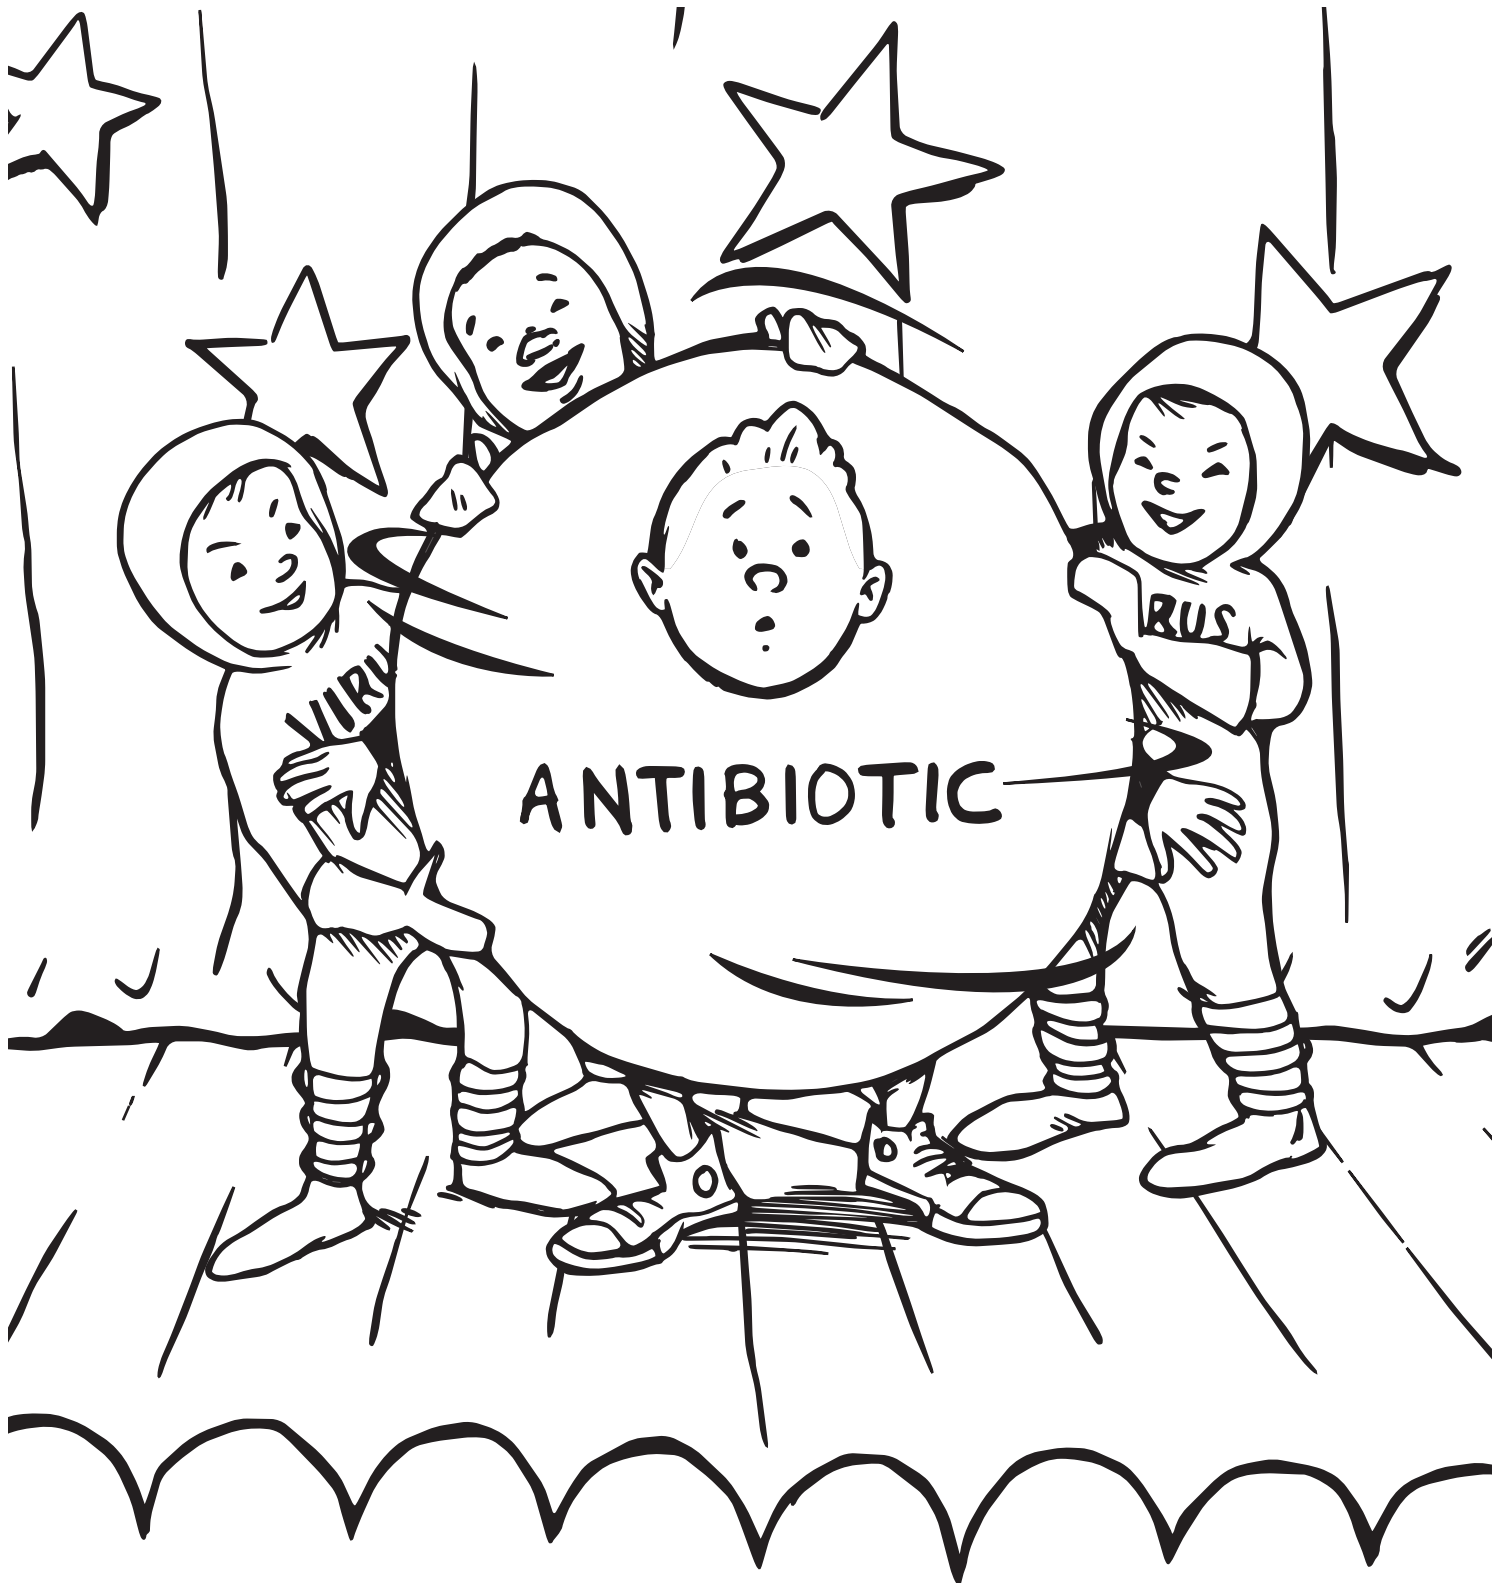

Act 2

"I'm a fighter against Bacterial Infection."

Act 3

"Oh, no. I'm powerless to stop viruses."

Final Act

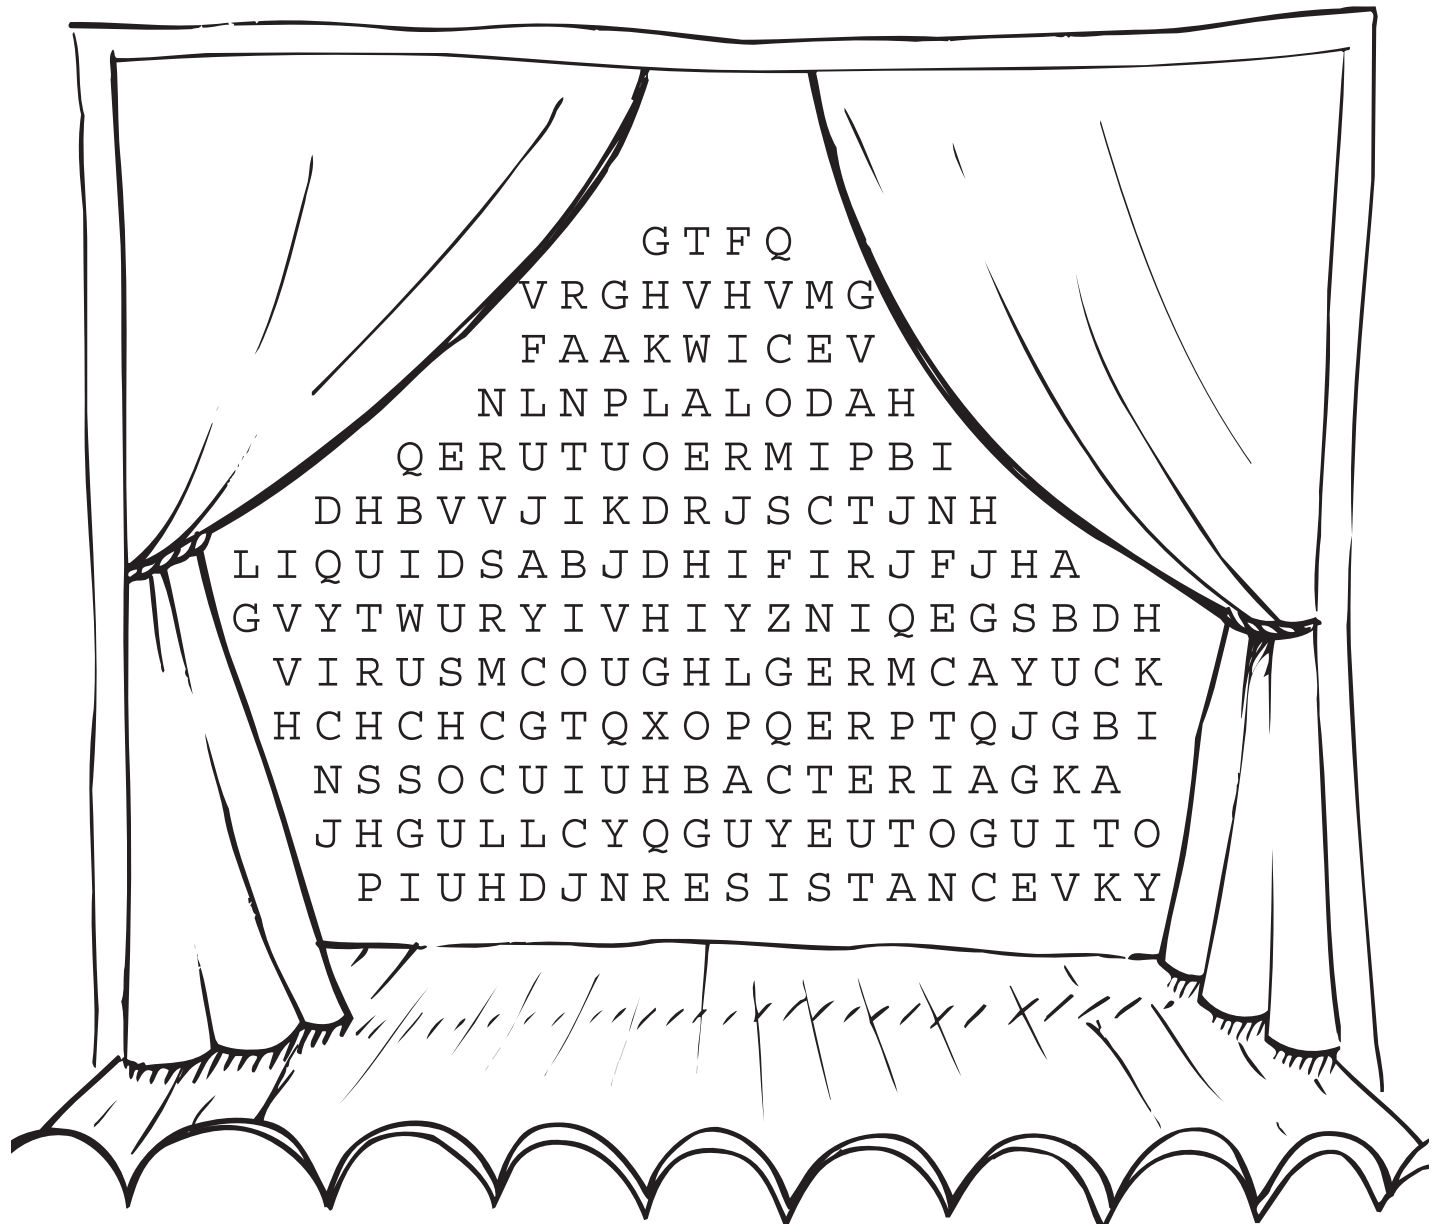

Save the antibiotic.

Don't use it when you don't need it.

Get Well Word Find.

antibiotic	germ
virus	cold
flu	cough
bug	medicine
yuck	bacteria
infection	liquids
vaporizer	resistance

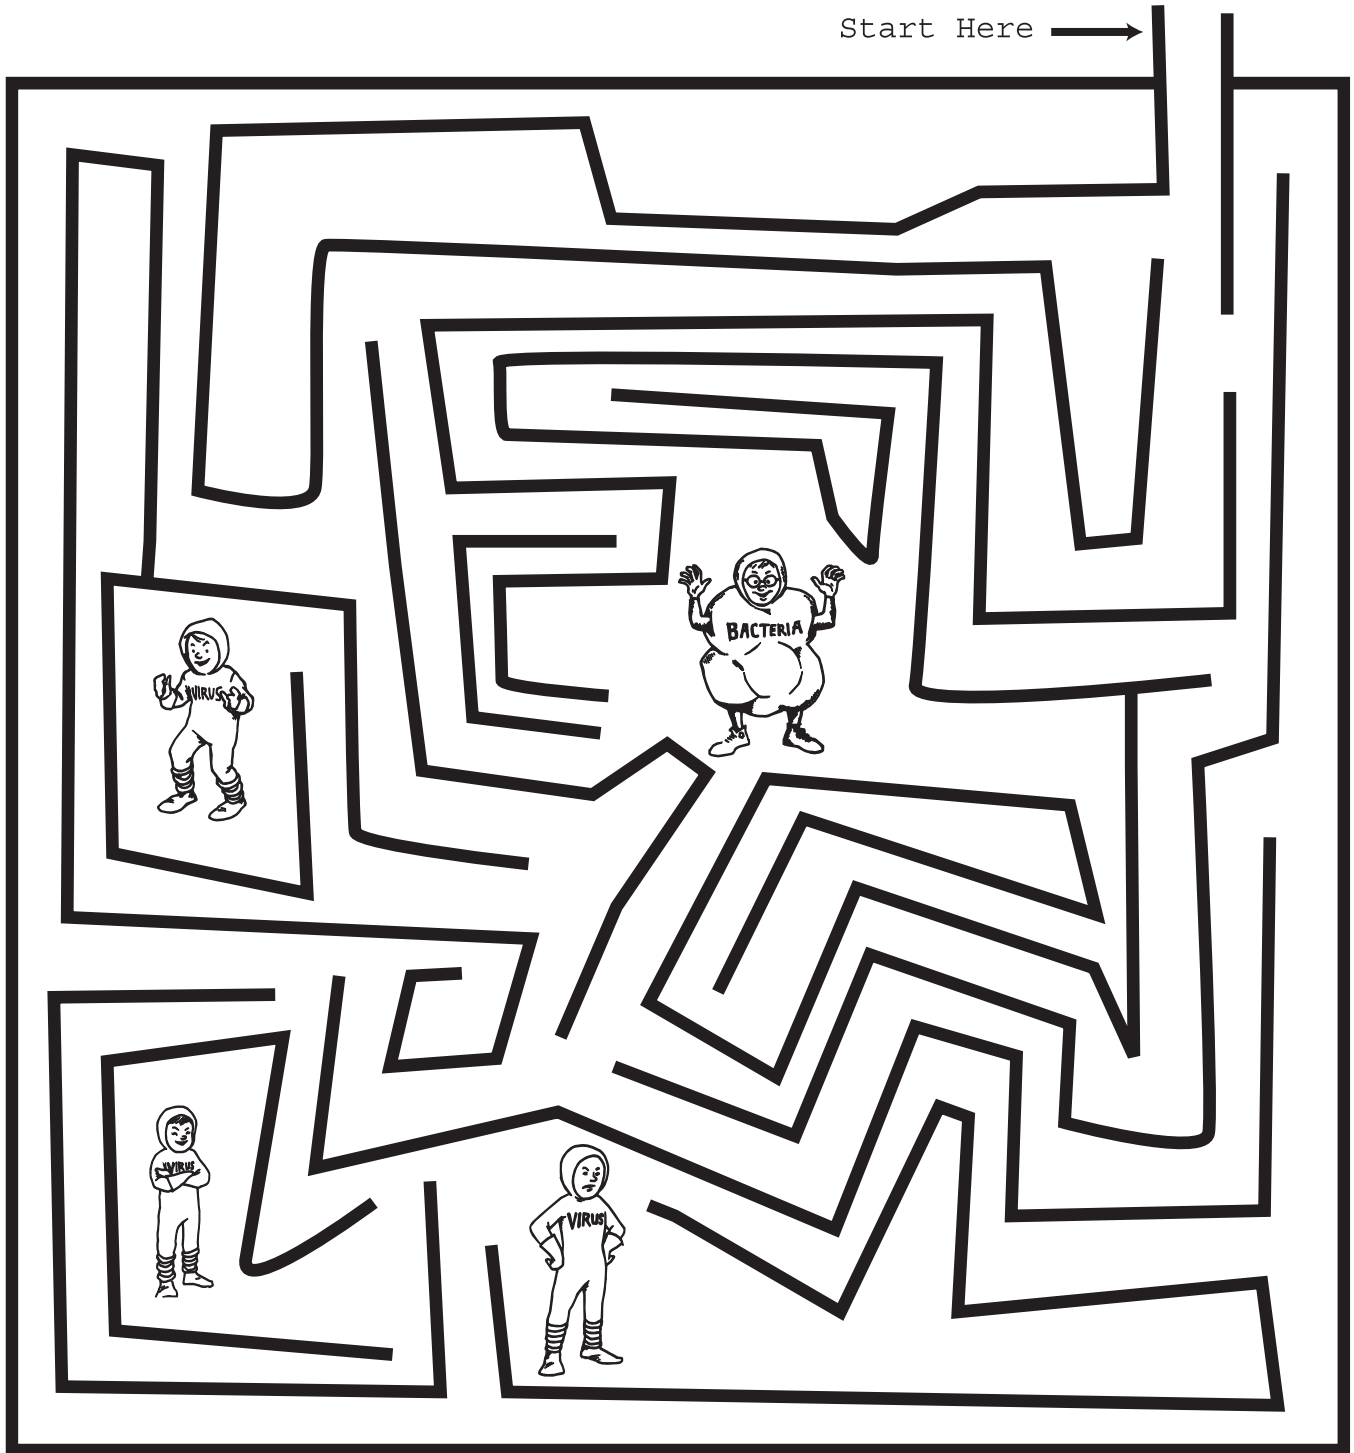

Save the antibiotic.

Help the antibiotic battle bacterial infection. But remember, stay clear of viruses.
