

ANTIBIOTIC USAGE DASHBOARD

The **Antibiotic Usage Dashboard** provides summary and detail data on antibiotic prescribing for your PCMH. This dashboard will replace the biannual Oral Antibiotic Prescribing List Report that was posted in the Report Center in Q2/Q4 of each year. Highlights of the new dashboard include:

- Data will be updated monthly to align with the release of the monthly PHMR. More frequent data releases will allow you to monitor antibiotic prescribing trends.
- Dashboard will allow a user to download beneficiary-level prescription details.

Example #1: Breakdown for the 3-17 age category

Antibiotic Prescribing Details Per Beneficiary – (export to Excel for additional review and analysis)

- PCMH ID
- Beneficiary ID, Last Name, First Name, Date of Birth, Gender
- Prescribing Provider ID, Name
- Date Dispensed
- Medication List
- Drug Class
- Beneficiary's Prescription Count
